Original Vacuum Preservation

Hitachi's original vacuum compartment extracts air to maintain approximately 0.8 atm of vacuum preservation and reduces oxygen to keep chilled meat, fish and dairy products fresh and nutritious.

Eco Monitoring Sensor

The controller is displayed automatically only when someone approaches it. It senses if a person is near the refrigerator and automatically switches on/off the energy saving mode. This is useful when you travel or leave your home for an extended period.

INVERTER × Dual Fan Cooling

Vacuum-sealed for Food Freshness

(Grande Series)

Vacuum-sealed for Food Freshness

The secret to longer-lasting freshness is reduced oxygen levels. Hitachi's original vacuum preservation extracts air to maintain approx. 0.8 atm (atmospheric pressure). The meat, fish and dairy products are kept fresh and nutritious, and ready to cook without defrosting.

Food Freshness

Refreshing Technology Maintains 0.8 atm Vacuum*6

Hitachi innovation at its finest and most consistent: the sealed pressure-resistant vacuum realises and maintains the vacuumed environment. A vacuum pump extracts air and reduces oxygen to achieve approx. 0.8 atm (atmospheric pressure) throughout usage.

Nutrition Retention

Stay healthy. A vacuumed environment prevents oxidation and retains nutrients inside the food.

DHA Value in Mackerel Stored after 3 Days*1 & *2

Vitamin C Value in Pineapples Stored after 3 Days*2 & *3

Vitamin C Value in Papaya Stored after 7 Days*3 & *4

Quick Seasoning

Quick seasoning is made possible because the compartment removes air from stored food, enabling seasoning to be absorbed at a faster rate. So, with less time required for seasoning and cooking, such as for marinated seasoning or dehydrating the dried items, there's more time for eating!

Penetration Rate of the Seasoning*5

Optimal Preservation

Preserves your favourite food in their optimal conditions.

Freshness Preservation

Excellent preservation of original flavour and texture, by keeping them fresh without getting frozen, and hydrated without the need for troublesome wrapping.*7

Moisture Retention Level

*1 Tested Model : R-X7300F. The effect may differ depending on types or freshness of food stored. This effect does not extend to best-before and expiration dates, and does not guarantee the indicated shelf life.
 *2 Tested by The Center for Scientific and Technological Equipment, Suranaree University of Technology under the rules, conditions and test results at the time of testing and analysis. Graph data calculated by Hitachi.
 *3 Tested by Hitachi.
 *4 Tested Model : R-M80VAGGD9X. The effect may differ depending on types or freshness of food stored. This effect does not extend to best-before and expiration dates, and does not guarantee the indicated shelf life.
 *5 Tested by Hitachi. Tested Model : R-S38JV. The effect may differ depending on types or freshness of food stored.
 *6 Vacuum means the space where the pressure is lower than the atmospheric pressure. The pressure in the Vacuum Compartment is about 0.8 atm, which is lower than the atmospheric pressure, hence, Hitachi considers this a vacuum.
 *7 Tested model (Sliced Chicken Ham) :R-WB640VFX. Tested model (Sliced Cheese, Salmon & Red Oak Lettuce) : R-S38JV.

Designed for Convenience

Auto Door (Grande Series)

Even when your hands are full, or the door is fully packed and heavy, there are two ways to open it up for you with a single touch.

Touch Open

Open each door with a single touch.

Slide Open

Touch the open button and slide, the door whose open button was touched first will open and the other door follows.

*The open button cannot be operated through clothes.
 *This function enables the door to be only partly opened to help reduce the burden of opening it.
 The angle that the doors open depends on the placement of the refrigerator.
 *The auto door function can be turned off to have the doors operate manually.
 *The auto door function of refrigerator does not operate when the vegetable compartment door is open.

Breakthrough Energy Saving Technology

Eco Monitoring Sensor (Grande Series)

The controller is displayed automatically only when someone approaches it. It senses if a person is near the refrigerator and automatically switches on/off the energy saving mode. This is useful when you travel or leave your home for an extended period.

VIP (Grande Series) -Vacuum Insulation Panel Technology*1

VIP is a thin panel with a very fine glass fibre vacuum inside, giving an extremely high heat insulation performance - much higher than that of Urethane, a conventional insulation material. It prevents external heat from escaping to achieve exceptional energy savings. Cooling retention is 15 hours, with the highest heat insulation performance during power cut.

*1 Comparative tests done with Hitachi's complete lineup.
 *2 Tested by Hitachi. Operating conditions may differ depending on situations.

INVERTER × Dual Fan Cooling*2

Provides optimal cooling in both the freezer and refrigerator compartments, something a single fan can't do. Improved Dual Fan Cooling with dedicated fans for each compartment ensures powerful cooling. This is supported by the Eco Thermo-Sensor in each compartment that detects any temperature change separately to enable the ideal temperature change to be maintained in each of the compartments at all times.

*Image of Grande Series.

Energy Saving

The Eco Thermo-sensor and Inverter Compressor control the amount of chilled air to be delivered to each compartment.

Powerful Cooling 60°C

Even if the ambient temperature reaches as high as 60°C, inside the refrigerator is still cooled.

Stabiliser Free 130V-300V

Even without a special stabiliser, Hitachi's inverter refrigerator can operate under wide voltage fluctuations from 130V-300V.

Long Cool Keeper 15 Hours

The temperature in the freezer compartment is maintained to keep food fresh in the event of a power cut, for up to 15 hours.

Tested by Hitachi. Operating conditions may differ depending on situations and specifications.

Fresh Vegetables

Separate Vegetable Compartment (Grande Series)

For long-lasting freshness, each of the cases maintains high humidity at the optimal level of approx. 90%*1 with indirect cooling. And the completely separate compartment is always full of clean air with no transferred odours thanks to Triple Power Filter.

Clean Water from Bottle Water

Tank Type Ice & Water Dispenser (Grande & Deluxe Series)

Just pour mineral or other purified water into the water tank. To serve you an iced water and ice automatically made for you. No trouble some plumbing is required, and you can install the unit virtually anywhere.

*Image of Grande Series.

*Image of Deluxe Series.

Clean Ice Automatically Made for You (Grande & Deluxe Series)

When you want to make ice quickly, switch the Quick Freezing mode ON. This will make ice approx. 14%*2 faster.

Powerful Deodorisation

Triple Power Filter

Triple Power Filter removes odour components*3 and removes bacteria on the filter by 99%.*4

Other Features

Quick Cooling

When you want to cool items quicker and more powerfully, switch the Quick Cooling mode ON. This cools items approx. 8%*2 faster.

Easy Twist Ice Maker (Standard Series)

Just twist the lever of the ice maker, the ice can be made easily. When you want to make ice quickly, switch the Quick Freezing mode ON.

*Image of Grande Series.

Elegant Interior Design

The interior space of the side by side refrigerator are meticulously designed for easy and convenience. Comes with an energy saving LED light.

Easily Store your Food in Drawers (Grande Series)

The drawers provide a continent space to store find the items at once glance.

*1 Moisture retention tested by Hitachi. The effect does not extend the best-before expiration dates and does not guarantee the indicated shelf life.

*2 Tested by Hitachi. Comparison between Quick freezing mode ON and OFF.

*3 Triple Power Filter that catches and removes 7 odour components (Tested by Hitachi. The type of odours : Methyl Mercaptan, Ammonia, Acetaldehyde, Trimethylamine, Propanal, Hexanal and Acetic Acid).

*4 Also provides a sterilising effect. Combining the properties of Activated Carbon, Zeolite and Manganese Oxide (catalyst), the filter greatly reduces the percentage of odours present over time. Testing organisation : Boken Quality Evaluation Institute. Testing method : Film adhesion method (JISZ2801). Name of processing component : Filter. Sterilisation method : Application of oxidation catalyst to filter. Subject : Bacteria trapped in filter. Test results : 99% sterilised after 24 hours, achieved using the filter alone. No effect on the environment and food inside the refrigerator.

Flexible Storage

Selectable Zone

The Selectable Zone feature allows you to customise mode settings based on your storage and lifestyle needs.

Freezer -18°C to -20°C

Ice Cream & Frozen Items
Wish to separate your frozen savoury food from your ice cream and ice? Now you can with an additional storage option of the Freezer setting.

Soft Freeze -3°C

Meat & Fish
Choose the Soft Freeze setting to keep meat and fish fresh; you can easily cook them instantly without the need to defrost.

Chill/Meat 1°C

Dairy & Meat
Keep your dairy, meat and fresh food in ideal 1°C in the Chill/Meat setting.

Refrigerator 3°C

Drinks & Foods
Running out of space for your drinks and food? You can now have extra storage refrigerator space at 3°C.

Cook instantly without the need to defrost with Soft Freeze -3°C

Easy Cutting
Softly frozen foods are easy to slice.

Easy to Prepare Portions
Just take the amount that is needed.

Cook Immediately
Cook without the need to defrost the food.

An Effortless Door Opening Experience

Auto Door with Illuminated Handles

Automatic LED lights illuminate the door handles when you approach it and the Auto Door technology provides an effortless opening experience like never before. Even when the doors are full, they can still open automatically at the touch of a button.

Illuminated Door Handles

The refrigerator can sense when a person is close and will automatically illuminate the door handles.

Seamless Touch-Open Door

At the touch of a button automatically open the refrigerator or freezer door.

Seamless Slide-Open Door

Simply slide your finger across the button and both the refrigerator and freezer doors will automatically open.

Fresh Vegetables with Organised Storage

Separate Vegetable Compartment

Thinner Walls for More Storage*1

Maxi Volume

No more worries, when you need more storage. Thanks to the thinner walls, the food storage space is 645 litres*2, providing an extra 76 litres*2 of storage space with the same width dimensions. More storage, means that you need fewer grocery trips and provides additional convenience when housing parties for your loved ones.

*The image is for illustrative purposes only.

Breakthrough Thinner Walls

Thanks to the thinner insulation materials of the walls, energy saving performance is achieved with a larger storage capacity, providing an extra 76 litres*2 with the same width dimensions.

VIP (Vacuum Insulation Panel) is a thin panel with a very fine glass fibre vacuum inside, which provides extremely high heat insulation performance – much higher than that of urethane, a conventional insulation material. It prevents external heat from escaping to achieve exceptional energy savings. Cooling retention is 15 hours, with the highest heat insulation performance during power cuts.

Fresh Vegetables with Organised Storage

Separate Vegetable Compartments

For long-lasting freshness, each of the cases maintains the moisture of the food at an optimal level of approximately 90%*3 with indirect cooling. The separate compartments in different sizes also help to easily organise various types of fruits and vegetables.

Optimal Storage

Select Case (Dry Food – Vegetable)

Select based on your storage needs. Suitable for preserving dry food or vegetables.

Even if the ambient temperature reaches as high as 60°C, inside the refrigerator is still cooled.

Stabiliser Free 130V-300V
Even without a special stabiliser, Hitachi's inverter refrigerator can operate under wide voltage fluctuations from 130V-300V.

Long Cool Keeper 15 Hours
The temperature in the freezer compartment is maintained to keep food fresh in the event of a power cut, for up to 15 hours.

* Tested by Hitachi. Operating conditions may differ depending on situations and specifications.

Other Features

Powerful Deodorisation

Triple Power Filter
Triple Power Filter removes odour components*1 and removes bacteria on the filter by 99%.*2

Clean Ice Automatically Made for You

Ice cubes can be made automatically and continuously simple by filling the tank with water. When you want to make your ice quickly, switch the Quick Freezing mode ON which can make the ice approx. 24%*3 faster.

Quick Cooling

When you want to cool quickly and powerfully, switch the Quick Cooling mode ON which cools approx. 27%*4 faster.

Big yet Easy to Use

The often-used refrigerator compartment is positioned at the top for easy use and offers a wide field of vision. Even with a lot of food stored, with the neat storage compartment, a glance is all you need to see everything, so it's easy to put in and take out items.

*1 Triple Power Filter that catches and removes 7 odour components (Tested by Hitachi. The type of odours : Methyl Mercaptan, Ammonia, Acetaldehyde, Trimethylamine, Propanal, Hexanal and Acetic Acid).
*2 Also provides a sterilising effect. Combining the properties of Activated Carbon, Zeolite and Manganese Oxide (catalyst), the filter greatly reduces the percentage of odours present over time. Testing organisation : Boken Quality Evaluation Institute. Testing method : Film adhesion method (JISZ2801). Name of processing component : Filter. Sterilisation method : Application of oxidation catalyst to filter. Subject : Bacteria trapped in filter. Test results : 99% sterilised after 24 hours, achieved using the filter alone. No effect on the environment and food inside the refrigerator.
*3 Tested by Hitachi. Comparison between Quick Freezing mode ON and OFF.
*4 Tested by Hitachi. Comparison between Quick Cooling mode ON and OFF.

Bright Vegetable Compartment with LED Light

With automatic lighted-LED, vegetable compartment becomes brighter and easier to find fresh food.

Double-deck Vegetable Storage

Select the vegetable mode of the Fresh Select to enjoy more storage space for vegetables.

Quick Cooling

When you want to cool quickly and powerfully, switch the quick cooling mode ON.

Approx. **28%***
Faster Cooling

* Tested by Hitachi. Comparison between conventional in normal mode and new 3 Door French Bottom Freezer in Quick Cooling mode on top shelf.

Movable Twist Ice Tray

For efficient use of storage space, ice tray can be moved or even removed as you like.

Touch Screen Controller

A simple touch allows you to change the settings.

Powerful Deodorisation

Triple Power Filter
Equipped with a Triple Power Filter that catches and removes 7 odour components.

Methyl Mercaptan
Odours of Onions and garlic

Ammonia
Odours of Raw fish

Acetaldehyde
Odours of Vinegar

Jumbo Door Pocket

For a storage of up to 8 bottles of 2.0L.

Easy-To-Open Door Design

Unique handle design for easy opening of fridge doors.

INVERTER x Dual Fan Cooling

Provides optimal cooling in both the freezer and refrigerator compartments, something a single fan cannot do. Improved Dual Fan Cooling with dedicated fans for each compartment ensures powerful cooling. This is supported by the Eco Thermo-Sensor in each compartment that detects any temperature change separately to enable the ideal temperature change to be maintained in each of the compartments at all times.

*4 Image is for illustrative purposes only.

Easy to See and Use

Easily see and reach for your favorite food with less bending and lifting. French doors take up less room space when opened, making it ideal for small spaces. More cold air is kept inside making it energy saving.

Energy Saving

The Eco Thermo-sensor and Inverter Compressor control the amount of chilled air to be delivered to each compartment.

Stabiliser Free 130V-300V

Even without a special stabiliser, Hitachi's inverter refrigerator can operate under wide voltage fluctuations from 130V-300V.

2 Door Glass

2 Door Stylish Glass Deluxe

2 Door Stylish Standard

Large-Capacity Single Door

The single large door pocket can store 5 of 2.0L drinking bottles for easy access.

Smart, Extendable Compartment for Crisp and Fresh Vegetables

The drawer featuring a sturdy frame with glass can hold and support items but it's easy to open and close, too. The case can be significantly extended to hold and arrange plenty of food, fruits and vegetables. A case cover prevents loss of moisture and keeps the fruits and vegetables crisp and fresh.

Quick Access, Easy-to-See Layout

Fridge compartment is located at the top which is a convenient height for usage. Just open the door and you can see and access everything stored planning menus ahead time.

Selectable Mode Compartment

The Select Lever lets you adjust the temperature inside the compartment by switching between the Vegetable and Dairy/Meat modes to match your lifestyle.

Vegetable Mode

- For storage of easily damaged soft fruits and vegetables
- Organises items by size

Freezer Compartment

Hybrid Freezing

Delicious Cooking Results

Thanks to the aluminium plate, items freeze rapidly. As well as retaining freshness, rapid freezing reduces drip during thawing, so flavor is also retained. It brings delicious cooking results!

Conventional

Large amount of drip
0.57g / 100g

Hybrid Freezing

Minimal drip
0.24g / 100g

Tested by Hitachi.
Comparison of the amount of drip released 4 hours after thawing from items frozen for 3 days.

Aluminum Plate

What's the advantage of Hybrid Freezing?

When meat and other food are frozen in the conventional way, water inside the cells freezes into large ice crystals which destroy the cell walls resulting in a large amount of drip when items are thawed. This is a major cause of loss of flavour. If food items rapidly pass through the temperature zone between -1°C and -5°C, ice crystals are kept small to minimise damage to cell wells and retain flavour.

*This figure is for illustrative purpose only.

Efficient Storage

The top of the freezer compartment is open so that you can reach items directly.

Easy Storage of Big Items

Bigger-sized frozen foods or compartments can be easily stored in this specially designed deep & large freezer case.

Refrigerator Compartment

Slide Shelf

Easy Access and Storage of Items at the Back

Slide shelf makes it easier to see and reach items at the back to enable efficient, organised storage.

Selectable Mode Compartment

Flexible Layout

Dimensions (mm)

□: Space required for ventilation.

Dual Sensing Control

Hitachi Refrigerators have two Eco Thermo Sensors, which detect any temperature changes separately to enable the ideal temperatures to be maintained in each of the compartments at all times.

If a refrigerator has only one sensor, which is usually in the refrigerator compartment, temperature changes in the freezer due to various factors can't be detected and stored items won't be properly frozen. Having an additional sensor also in the freezer ensures that won't happen and every item that is stored in each compartment is kept in optimal condition.

Fresh Select

The Select Lever lets you adjust the inside temperature by switching between the two modes.

Vegetable Mode

- For storage of easily damaged soft fruits and vegetables
- Organises items by size

Dairy / Meat Mode

- Keeps meat and fish fresh
