Original Vacuum Preservation

Hitachi's original vacuum compartment extracts air to maintain approximately 0.8 atm of vacuum preservation and reduces oxygen to keep chilled meat, fish and dairy products fresh and nutritious.

Eco Monitoring Sensor

The controller is displayed automatically only when someone approaches it. It senses if a person is near the refrigerator and automatically switches on/off the energy saving mode. This is useful when you travel or leave your home for an extended period.

INVERTER × Dual Fan Cooling

Vacuum-sealed for Food Freshness

(Grande & 3 Door Deluxe Series)

Vacuum-sealed for Food Freshness

The secret to longer-lasting freshness is reduced oxygen levels. Hitachi's original vacuum preservation extracts air to maintain approx. 0.8 atm (atmospheric pressure). The meat, fish and dairy products are kept fresh and nutritious, and ready to cook without defrosting.

Food Freshness

Refreshing Technology Maintains 0.8 atm Vacuum*6

Hitachi innovation at its finest and most consistent: the sealed pressure-resistant vacuum realises and maintains the vacuumed environment. A vacuum pump extracts air and reduces oxygen to achieve approx. 0.8 atm (atmospheric pressure) throughout usage.

*Image of 3 Door Deluxe Series.

Nutrition Retention

Stay healthy. A vacuumed environment prevents oxidation and retains nutrients inside the food.

DHA Value in Mackerel Stored after 3 Days*1 & *2

Vitamin C Value in Pineapples Stored after 3 Days*2 & *3

Vitamin C Value in Papaya Stored after 7 Days*3 & *4

Quick Seasoning

Quick seasoning is made possible because the compartment removes air from stored food, enabling seasoning to be absorbed at a faster rate. So, with less time required for seasoning and cooking, such as for marinated seasoning or dehydrating the dried items, there's more time for eating!

Penetration Rate of the Seasoning*5

Optimal Preservation

Preserves your favourite food in their optimal conditions.

A Tale of 2 Temperature Zones*10

Now, you can truly chill. Store your food without freezing by selecting a suitable temperature for the stored items, and help prevent deterioration of flavours and texture.

Vacuum Sub Zero Mode Approx. -1°C Vacuum Chilled Mode Approx. 1°C

Freshness Preservation

Excellent preservation of original flavour and texture, by keeping them fresh without getting frozen, and hydrated without the need for troublesome wrapping.*7

Moisture Retention Level

Designed for Convenience

Auto Door (Grande Series)

Even when your hands are full, or the door is fully packed and heavy, there are two ways to open it up for you with a single touch.

Touch Open

Open each door with a single touch.

Slide Open

Touch the open button and slide, the door whose open button was touched first will open and the other door follows.

*The open button cannot be operated through clothes.
 *This function enables the door to be only partly opened to help reduce the burden of opening it.
 The angle that the doors open depends on the placement of the refrigerator.
 *The auto door function can be turned off to have the doors operate manually.
 *The auto door function of refrigerator does not operate when the vegetable compartment door is open.

Breakthrough Energy Saving Technology

Eco Monitoring Sensor (Grande Series)

The controller is displayed automatically only when someone approaches it. It senses if a person is near the refrigerator and automatically switches on/off the energy saving mode. This is useful when you travel or leave your home for an extended period.

VIP (Grande Series) -Vacuum Insulation Panel Technology*1

VIP is a thin panel with a very fine glass fibre vacuum inside, giving an extremely high heat insulation performance - much higher than that of Urethane, a conventional insulation material. It prevents external heat from escaping to achieve exceptional energy savings. Cooling retention is 15 hours, with the highest heat insulation performance during power cut.

*1 Comparative tests done with Hitachi's complete lineup.
 *2 Tested by Hitachi. Operating conditions may differ depending on situations.

INVERTER × Dual Fan Cooling*2

Provides optimal cooling in both the freezer and refrigerator compartments, something a single fan can't do. Improved Dual Fan Cooling with dedicated fans for each compartment ensures powerful cooling. This is supported by the Eco Thermo-Sensor in each compartment that detects any temperature change separately to enable the ideal temperature change to be maintained in each of the compartments at all times.

*Image of Grande Series.

Energy Saving

The Eco Thermo-sensor and Inverter Compressor control the amount of chilled air to be delivered to each compartment.

Powerful Cooling 60°C

Even if the ambient temperature reaches as high as 60°C, inside the refrigerator is still cooled.

Stabiliser Free 130V-300V

Even without a special stabiliser, Hitachi's inverter refrigerator can operate under wide voltage fluctuations from 130V-300V.

Long Cool Keeper 15 Hours

The temperature in the freezer compartment is maintained to keep food fresh in the event of a power cut, for up to 15 hours.

Tested by Hitachi. Operating conditions may differ depending on situations and specifications.

Fresh Vegetables

Moisture Guard Vegetable Compartment (Deluxe Series)

For long-lasting freshness, moisture guard compartment maintains the moisture of the food at the optimal level of approx. 90%*1 with indirect cooling. And the completely separate compartments are always full of clean air with no transferred odours thanks to the Triple Power Filter.

Moisture Retention 90%*1

The moisture guard keeps the stored vegetables at the optimal environment for 7 days.*1

Kale Stored after 7 Days

Clean Water from Bottle Water

Tank Type Ice & Water Dispenser (Grande & Deluxe Series)

Just pour mineral or other purified water into the water tank. To serve you an iced water and ice automatically made for you. No trouble some plumbing is required, and you can install the unit virtually anywhere.

*Image of 3 Door Deluxe Series.

*Image of Deluxe Series.

Clean Ice Automatically Made for You (Grande & Deluxe Series)

When you want to make ice quickly, switch the Quick Freezing mode ON. This will make ice approx. 14%*2 faster.

Powerful Deodorisation

Triple Power Filter

Triple Power Filter removes odour components*3 and removes bacteria on the filter by 99%.*4

Other Features

Quick Cooling

When you want to cool items quicker and more powerfully, switch the Quick Cooling mode ON. This cools items approx. 8%*2 faster.

Easy Twist Ice Maker (Standard Series)

Just twist the lever of the ice maker, the ice can be made easily. When you want to make ice quickly, switch the Quick Freezing mode ON.

*Image of 3 Door Deluxe Series.

Elegant Interior Design

The interior space of the side by side refrigerator are meticulously designed for easy and convenience. Comes with an energy saving LED light.

Easily Store your Food in Drawers (Standard Series)

The drawers provide a continent space to store find the items at once glance.

*1 Moisture retention tested by Hitachi. The effect does not extend the best-before expiration dates and does not guarantee the indicated shelf life.

*2 Tested by Hitachi. Comparison between Quick freezing mode ON and OFF.

*3 Triple Power Filter that catches and removes 7 odour components (Tested by Hitachi. The type of odours : Methyl Mercaptan, Ammonia, Acetaldehyde, Trimethylamine, Propanal, Hexanal and Acetic Acid).

*4 Also provides a sterilising effect. Combining the properties of Activated Carbon, Zeolite and Manganese Oxide (catalyst), the filter greatly reduces the percentage of odours present over time. Testing organisation : Boken Quality Evaluation Institute. Testing method : Film adhesion method (JISZ2801). Name of processing component : Filter. Sterilisation method : Application of oxidation catalyst to filter. Subject : Bacteria trapped in filter. Test results : 99% sterilised after 24 hours, achieved using the filter alone. No effect on the environment and food inside the refrigerator.

Frameless Glass Design (Deluxe & Standard Series)

Add a touch of elegance to your kitchen with the new full glass frameless door design. Comes in Mirror and Matte White.

Wish to separate your frozen savoury food from your ice cream and ice? Now you can with an additional storage option of the Freezer setting.

Soft Freeze -3°C

Meat & Fish

Choose the Soft Freeze setting to keep meat and fish fresh; you can easily cook them instantly without the need to defrost.

Cook instantly without the need to defrost with Soft Freeze -3°C

Easy Cutting

Softly frozen foods are easy to slice.

Easy to Prepare Portions

Just take the amount that is needed.

Cook Immediately

Cook without the need to defrost the food.

Fresh Vegetables with Organised Storage

Separate Vegetable Compartment

For long-lasting freshness, each of the cases maintains the moisture of the food at the optimal level of approx. 90%* with indirect cooling. And the completely separate compartments are always full of clean air with no transferred odours thanks to the Triple Power Filter.

* Tested by Hitachi. Differs depending on the amount and type of vegetables.

Optimal Storage

Select Case (Dry Food - Vegetable)

Select based on your storage needs. Ideal for preserving dry food or vegetable.

Breakthrough Energy Saving

INVERTER × Dual Fan Cooling

Provides optimal cooling in both the freezer and refrigerator compartments, something a single fan cannot do. Improved Dual Fan Cooling with dedicated fans for each compartment ensures powerful cooling. This is supported by the Eco Thermo-Sensor in each compartment that detects any temperature change separately to enable the ideal temperature change to be maintained in each of the compartments at all times.

* Image is for illustrative purposes only.

Energy Saving

The Eco Thermo-sensor and Inverter Compressor control the amount of chilled air to be delivered to each compartment.

Powerful Cooling 60°C

Even if the ambient temperature reaches as high as 60°C, inside the refrigerator is still cooled.

Stabiliser Free 130V-300V

Even without a special stabiliser, Hitachi's inverter refrigerator can operate under wide voltage fluctuations from 130V-300V.

Long Cool Keeper 15 Hours

The temperature in the freezer compartment is maintained to keep food fresh in the event of a power cut, for up to 15 hours.

* Tested by Hitachi. Operating conditions may differ depending on situations and specifications.

Other Features

Powerful Deodorisation

Triple Power Filter
Triple Power Filter removes odour components*1 and removes bacteria on the filter by 99%.*2

Clean Ice Automatically Made for You

Ice cubes can be made automatically and continuously simple by filling the tank with water. When you want to make your ice quickly, switch the Quick Freezing mode ON which can make the ice approx. 24%*3 faster.

Quick Cooling

When you want to cool quickly and powerfully, switch the Quick Cooling mode ON which cools approx. 27%*4 faster.

Big yet Easy to Use

The often-used refrigerator compartment is positioned at the top for easy use and offers a wide field of vision. Even with a lot of food stored, with the neat storage compartment, a glance is all you need to see everything, so it's easy to put in and take out items.

*1 Triple Power Filter that catches and removes 7 odour components (Tested by Hitachi. The type of odours : Methyl Mercaptan, Ammonia, Acetaldehyde, Trimethylamine, Propanal, Hexanal and Acetic Acid).
*2 Also provides a sterilising effect. Combining the properties of Activated Carbon, Zeolite and Manganese Oxide (catalyst), the filter greatly reduces the percentage of odours present over time. Testing organisation : Boken Quality Evaluation Institute. Testing method : Film adhesion method (JISZ2801). Name of processing component : Filter. Sterilisation method : Application of oxidation catalyst to filter. Subject : Bacteria trapped in filter. Test results : 99% sterilised after 24 hours, achieved using the filter alone. No effect on the environment and food inside the refrigerator.
*3 Tested by Hitachi. Comparison between Quick Freezing mode ON and OFF.
*4 Tested by Hitachi. Comparison between Quick Cooling mode ON and OFF.

Freezer Compartment

Hybrid Freezing

Delicious Cooking Results
Thanks to the aluminium plate, items freeze rapidly. As well as retaining freshness, rapid freezing reduces drip during thawing, so flavor is also retained. It brings delicious cooking results!

Conventional

Large amount of drip
0.57g / 100g

Hybrid Freezing

Minimal drip
0.24g / 100g

Tested by Hitachi.
Comparison of the amount of drip released 4 hours after thawing from items frozen for 3 days.

Aluminum Plate

What's the advantage of Hybrid Freezing?
When meat and other food are frozen in the conventional way, water inside the cells freezes into large ice crystals which destroy the cell walls resulting in a large amount of drip when items are thawed. This is a major cause of loss of flavour. If food items rapidly pass through the temperature zone between -1°C and -5°C, ice crystals are kept small to minimise damage to cell wells and retain flavour.

*This figure is for illustrative purpose only.

Easy Access Case Efficient Storage

The top of the freezer compartment is open so that you can reach items directly.

Deep & Large Case Easy Storage of Big Items

Bigger-sized frozen foods or compartments can be easily stored in this specially designed deep & large freezer case.

Refrigerator Compartment

Slide Shelf

Easy Access and Storage of Items at the Back

Slide shelf makes it easier to see and reach items at the back to enable efficient, organised storage.

Dual Sensing Control

Hitachi Refrigerators have two Eco Thermo Sensors, which detect any temperature changes separately to enable the ideal temperatures to be maintained in each of the compartments at all times.

If a refrigerator has only one sensor, which is usually in the refrigerator compartment, temperature changes in the freezer due to various factors can't be detected and stored items aren't properly frozen. Having an additional sensor also in the freezer ensures that won't happen and every item that is stored in each compartment is kept in optimal condition.

Spot Cooling Function

For items that you want to cool off quickly and powerfully, there is a space prepared on the middle shelf with a spot cooling function, where the direct chilled air hits those items placed there. This is convenient when you want to cool drinks quickly.

Fresh Select

*¹ Without ice tray.
*² Triple Power Filter that catches and removes 7 odour components (Tested by Hitachi. The type of odours : Methyl Mercaptan, Ammonia, Acetaldehyde, Trimethylamine, Propanal, Hexanal and Acetic Acid).
*³ Also provides a sterilising effect. Combining the properties of Activated Carbon, Zeolite and Manganese Oxide (catalyst), the filter greatly reduces the percentage of odours present over time. Testing organisation : Boken Quality Evaluation Institute. Testing method : Film adhesion method (JISZ2801). Name of processing component : Filter. Sterilisation method : Application of oxidation catalyst to filter. Subject : Bacteria trapped in filter.
Test results : 99% sterilised after 24 hours, achieved using the filter alone. No effect on the environment and food inside the refrigerator.
*⁴ Weight resistance of the tempered glass. Images are for illustrative purpose only.

General Features

- Inverter Control
- Dual Fan Cooling
- Eco Thermo-Sensor
- Triple Power Filter
- Mouldproof Door Gasket
- No Frost ● CFC Free ● HFC Free

Dimensions (mm)

Dual Sensing Control

Hitachi Refrigerators have two Eco Thermo Sensors, which detect any temperature changes separately to enable the ideal temperatures to be maintained in each of the compartments at all times.

If a refrigerator has only one sensor, which is usually in the refrigerator compartment, temperature changes in the freezer due to various factors can't be detected and stored items won't be properly frozen. Having an additional sensor also in the freezer ensures that won't happen and every item that is stored in each compartment is kept in optimal condition.

Fresh Select

The Select Lever lets you adjust the inside temperature by switching between the two modes.

Vegetable Mode

- For storage of easily damaged soft fruits and vegetables
- Organises items by size

Dairy / Meat Mode

- Keeps meat and fish fresh
- Thaws frozen foods
- Rapidly cools drinks

*Applies to the 290L / 230L models.

Vegetable Compartment

The vegetable compartment provides plenty of space to store large fruits and vegetables and to keep them fresh. Using Fresh Select in the Vegetable mode gives you even more storage space for neat organisation.

* The extra 15L provided by Fresh Select in the Vegetable mode lets you enjoy a total of 41L of space for large capacity storage. (Capacities 26L: Vegetable Compartment and 41L: total apply to the 290L model only.)

Movable Twist Ice Tray

You can move the ice tray or even remove it for more convenient and efficient use of storage space. *for R-H350PG7

Tempered Glass Shelves

Scratch-proof and heat-resistant, the tempered glass shelves can even hold up to 100kg* each. *Weight resistance of Tempered Glass.
